

## Develop your career! Choose Lincoln Electric!

---

Robolution, a Lincoln Electric Company, is a full-service automation integrator providing engineering, machining and integrated robotic systems with core competencies in advanced welding system design, high-quality welding fixtures, robotic integration, process automation and ongoing service and support.

**We are looking for a Service technician (m/f/d) to support our team in Weiterstadt.**

---

### YOU ARE

- Completed qualification in the field of mechatronics, electrical engineering or industrial automation
- Advanced knowledge with at least 2-3 years of experience
- Programming of ABB and Yaskawa robots
- Welding knowledge in automated field with at least 2-3 years of experience
- English language skills are an advantage
- Willingness to travel, if necessary abroad
- PLC knowledge (Siemens TIA Portal)

### WE OFFER

- Attractive, family-like working environment in an internationally active company
- Helpful colleagues and structured familiarization with new tasks
- Performance-related remuneration with special benefits
- Detailed induction and permanent employment
- Fair and personal contact
- Large network of renowned customers

### YOUR TASKS

- Assembly and commissioning of automation projects/robot systems at the Robolution site and at the customer's site
- Elaboration, optimization and further development of new and existing automation concepts
- Training and service at our customers
- Handover of the machines and plants to the customer including explanation of the mode of operation
- Preparation of documentation of the work carried out
